

# CONSTRUCTION CONNECTION

*Hudsonville Public Schools Bond Progress Bulletin - February 2020*

## FOREST GROVE BUS LOOP

This summer we will be restructuring the parking lot at Forest Grove. The parent drop off and staff/parent parking will be expanded to allow for additional parking and easier flow for drop off and pick up. We will also be moving the bus loop to the east side of the building.

## BALDWIN MS RE-ROOF

The re-roof project at Baldwin will begin to get underway this coming summer. Due to the large scope of the project, it will take two summers to complete. The first phase will replace the north-east portion of the roof and next summer will complete the south-west side.

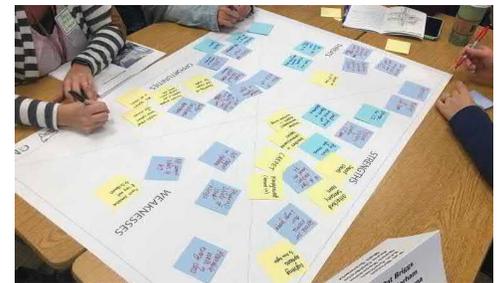

## NEW 5/6 BUILDING

We hope to have a final design of the building by late spring (2020). The plan is to present a building design to the Board by the end of April. That would allow the architects to finalize drawings before we 'go to bid' in the fall. If everything goes as planned, we would break ground in the spring of 2021 and finish the work by the fall of 2023. Future updates will include the plan for staffing the 5/6 building.

Several aspects of the building have not yet been determined. We are still determining several issues, such as recess, start time, categorical programming, specials format, etc. Please reach out to an administrator if you have questions/concerns.

Now that site visits have been completed and the initial design phase is done, we are working with a small team focused on making this building a model school. Anne Armstrong, Pat Briggs, Bill Ross (RMS), Andy Secor (JUE), and Ami Taylor are meeting bi-weekly throughout the design phase.

## HIGH SCHOOL EXPANSION

The design of the new gymnasium and connector between the High School and Freshman Campus is well underway. We are excited to design a main office focused on safety that also provides an athletic venue that will house multiple events (including graduation) while providing space for additional sports.

Some key components of the new athletic facility include top entry seating for 3600+, three practice courts, additional locker rooms, practice rooms, and a new weight room. Once the project is complete the fall of 2023, additional parking will be available where the current fitness center is.

The connection between the HS and the FC will also be completed by the fall of 2023 (or a little sooner). This will incorporate the main entrance to Hudsonville High School, counseling offices, additional classrooms, and collaborative learning spaces. Feel free to reach out to any of the team members regarding this facility, Anne Armstrong, Jordan Beel (HS), Pat Briggs, Ami Taylor, Kevin Wolma (HS).

## OTHER UPDATES

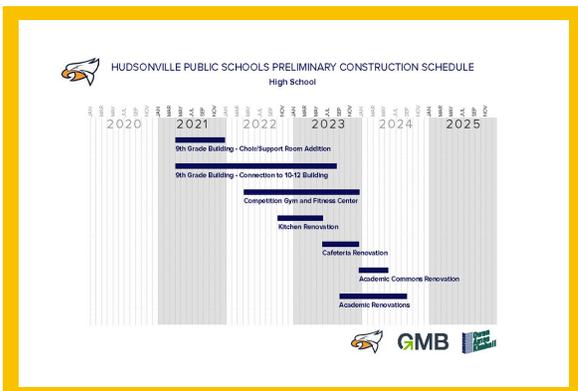

Currently, the main focus is on the 5/6 building and HS campuses, but we are starting to work on the second phase. The elementary gyms (Bauer, Forest Grove, and Park ) will soon be on the front burner as well as work at various buildings.

This summer, Alward Elementary will undergo minor roof repair to fix leaking that is occurring at the abutment of the new addition.

Park Elementary will have extensive work, but in order to begin this construction, we will need to wait until the 5th graders enter the new 5/6 building. More on that building in future updates.
